

Task 4

Calculate the total number of enrollments per course. Display course_name and enrollment_count.

```
201
202 -- task 4
203 -- Calculate the total number of enrollments per course. Display course_name and enrollment_count.
204 • select c.course_name, COUNT(e.enrollment_id) as enrollment_count
205 from courses c
206 left join enrollments e on c.course_id = e.course_id
207 group by c.course_name;
```

course_name	enrollment_count
Data Structures & Algorithms	4
Database Management Systems	2
Object Oriented Programming	2
Circuit Theory	2
Thermodynamics	0

Find the average salary of professors per department. Round to 2 decimal places.

```
208
209 -- Find the average salary of professors per department. Round to 2 decimal places.
210 • select round(avg(salary),2) as avg_salary, dept_name
211 from professors p left join departments d on d.department_id = p.department_id
212 group by dept_name;
213
```

avg_salary	dept_name
91500.00	Computer Science
82000.00	Electronics
79000.00	Mechanical
76000.00	Civil

Find all departments where the total budget exceeds 600,000

```

214 -- Find all departments where the total budget exceeds 600,000
215 • select dept_name
216 from departments
217 group by dept_name
218 having sum(budget) >600000;

```

	Electronics

Show the grade distribution for course CS101: count of each grade (A, B, C, D, F).

```

220 -- Show the grade distribution for course CS101: count of each grade (A, B, C, D, F).
221 • select c.course_name,e.grade,COUNT(*) AS grade_count
222 from courses c join enrollments e
223 on c.course_id = e.course_id
224 where c.course_code = 'CS101'
225 group by c.course_name, e.grade;

```

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	course_name	grade	grade_count
▶	Data Structures & Algorithms	A	2
	Data Structures & Algorithms	B	2

Using HAVING, list departments where more than 2 students are enrolled across all courses in that department.

```

227 -- Using HAVING, list departments where more than 2 students are enrolled across all courses in that department.
228 • select d.dept_name, count(e.student_id) as total_students
229 from departments d join courses c on c.department_id = d.department_id
230 join enrollments e on e.course_id = c.course_id
231 group by dept_name
232 having count(e.student_id) >2;

```
